Submission Notes

This PDF contains the source code files used for the EduPulse AI project. The code is copied directly from the local project files so that the PDF and GitHub code stay consistent.

Included	Frontend React code, backend NestJS code, Python AI service, Prisma schema, and validation scripts.
Excluded	node_modules, dist/build output, logs, .env secrets, lock files, generated code, binary assets, and mock seed data.
Why excluded	These files are dependencies, generated output, secrets, or large test data. They are not the main source code written for
Third-party code	Libraries are used through package dependencies only. Their internal source code is not included in this PDF.

Project Structure Included

```
edupulse-backend/ai-service/app/__init__.py
edupulse-backend/ai-service/app/main.py
edupulse-backend/ai-service/evaluation/evaluate_ai.py
edupulse-backend/ai-service/requirements.txt
edupulse-backend/nest-cli.json
edupulse-backend/package.json
edupulse-backend/prisma/schema.prisma
edupulse-backend/scripts/ai-dataset-audit.ts
edupulse-backend/scripts/ai-golden-validation.ts
edupulse-backend/scripts/ai-result-utils.ts
edupulse-backend/scripts/tenant-isolation-test.ts
edupulse-backend/src/actions/actions.controller.ts
